MICAH ROBINSON

Frisco, TX 75033 | 469-380-6281 | micahjrob0804@gmail.com | https://github.com/IB1J

SUMMARY

Detail-oriented technical analyst with proficiency in Embedded C/C++, digital circuits, and project management. Successfully led a lab group in advanced physics experiments, ensuring high-quality data collection and analysis.

EDUCATION

Associate of Science: Computer Science
Collin College – Frisco, TX
Graduated: May 2026
• GPA: 3.88
• Magna Cum Laude Recipient
• Phi Theta Kappa Honors Member
• Additional Coursework: Calculus II, University Physics II, Programming Fundamentals I

SKILLS

- Embedded C/C++
- Digital Circuit Fundamentals
- I2C Protocol
- Version Control
- Project Management
- Technical Troubleshooting
- Effective Communication
- Team Collaboration

PROJECTS

Simon Says Game | May 2026

- Designed a state machine-driven game on Arduino Uno with shift register, LCD, passive buzzer, and interrupt-driven input.
- Implemented hardware abstraction layer and data-driven architecture in C++.
- Documented with Fritzing schematic, demo video, and professional README on GitHub.
- GitHub: https://github.com/IB1J/Simon-Says

I2C Multi-Sensor System | May 2026

- Integrated MPU-6050 IMU, BMP280 barometer, and SSD1306 OLED on a shared I2C bus using raw Wire transactions.
- Implemented register-level drivers without library abstraction, including BMP280 calibration compensation formulas.
- Decoded bus traffic using a logic analyzer for hardware debugging.
- GitHub: https://github.com/IB1J/I2C-Sensor-System

EXPERIENCE

Student Academic Mentor | Self-employed – Frisco, TX
August 2025 – December 2025
Mentored and tutored four struggling physics students over one semester, raising their average performance from low grades to consistent high B grades.

Technical Analyst | Physics Lab – Frisco, TX
August 2025 – December 2025

- Led a 4-person lab group in advanced physics experiments, maintaining a 98%+ average through high-quality data collection and rigorous analysis.
- Analyzed experimental data to identify patterns and trends in research findings.
- Assisted researchers in developing and testing new physics experiments.
- Managed laboratory equipment maintenance and ensured calibration accuracy.
